Abstract of **KR9611238**

The acid-resistant omeprazole preparation is composed of a medicine layer containing omeprazole; and an enteric coating layer containing enteric polymer. It is particularly prepared by introducing a concentration gradient in one layer or both layers of the medicinal substance layer and the enteric coating layer. The more outer, the thinner the concentration of the medicinal substance layer is. And the more outer, the denser the concentration of the enteric polymer is.
